

### 13 - Climate Action

#### 13-02 Use of Low-Carbon Energy

##### 13-02-01

Does your university, as an institution, measure the amount of low-carbon energy used on campus?

**Not available.**

##### 13-02-01-01

Total energy used

##### 13-02-01-02

Total energy used from low-carbon sources

**Not available.**

#### 13-03 Environmental Education Measures

##### 13-03-01

Does your university, as an institution, offer local educational programs or campaigns on the risks of climate change, its impacts, mitigation, adaptation, reducing impacts, and early warning?

**Yes, through educational programs and campaigns on the risks of climate change, its impacts, mitigation, adaptation, reducing impacts, and early warning. These initiatives may include courses, workshops, public lectures, local national and international conferences aimed at educating students, staff, and the local community about climate change and sustainability.**

##### 13-03-02

Does your university, as an institution, have a climate action plan that is shared with local government and/or neutral community groups?

**Yes, my university has a climate action plan that it shares with local authorities and/or neutral community groups. a plan to promote sustainability and address the impacts of climate change. It is often made public and may involve working with local stakeholders to ensure broader community engagement and alignment with regional climate goals.**

##### 13-03-03

Does your university, as an institution, participate in collaborative planning to address climate change disasters, which may include internal and cross-border displacement, by working with the government?

Dean of the Faculty

Department head

Yes, the university participates in collaborative planning to address climate change-related disasters, which may include displacement, working with government. The institution may engage in research, policy advocacy and partnerships with government agencies to help prepare for and respond to climate-related challenges, through conference outcomes and recommendations. This may involve providing expertise in areas such as disaster risk reduction, climate adaptation strategies and humanitarian response.

13-03-04

Does your university, as an institution, inform and support local or regional government on early warning and monitoring of local climate change disaster risks?

Yes, through research outcomes, graduation theses, PhD dissertations, and summaries from conferences and demonstrations organized by the university.

13-03-05

Does your university, as an institution, cooperate with non-governmental organizations on climate adaptation?

Not available.

#### 13-04 Commitment to Carbon-Neutral University

13-04-01

Does your university, as an institution, have a target date for becoming carbon neutral according to greenhouse gas protocols?

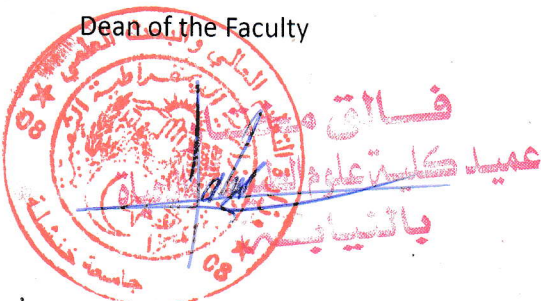

Not available.

13-04-02

Achieved by

Not available.
