Goal 12 Indicators: Rational Consumption and Production

12-04 Publication of Sustainability Report

Indicator Question

Answer

Yes: The university's efforts are systematically documented in "the university's sustainability report, and it is published annually to highlight progress and identify areas for improvement." The report indicates the provision of data on waste reduction and recycling rates, demonstrating institutional transparency in reporting sustainability achievements. Abbas Laghrou University has established a robust framework for sustainability reporting, demonstrating its commitment to transparency, accountability, and continuous environmental improvement. The annual publication of a comprehensive sustainability report represents a critical component of the institution's environmental governance structure.

12-04-01 Publication of sustainability report

Systematic Documentation and Reporting Framework

The university has developed a systematic approach to documenting its sustainability efforts, ensuring that environmental initiatives are not merely implemented but also carefully tracked, analyzed, and communicated. This structured methodology involves:

Data Collection Systems: The university has established dedicated processes for gathering quantitative and qualitative data across all campus operations. This includes establishing baseline measurements, setting specific targets, and tracking progress throughout the academic year.

Standardized Metrics: The reporting framework utilizes recognized sustainability indicators that allow for meaningful comparisons over time and potential benchmarking against other institutions. This ensures that progress is measured consistently

Indicator Question

Answer

and objectively.

Cross-Departmental Coordination: Sustainability reporting requires input from multiple university departments, from facilities management to academic units, creating an integrated view of institutional environmental performance.
