

SDG 17: Partnerships for the Goals

Abbas Laghrou University of Khenchela, based on the detailed report, is a pioneering model in achieving SDG 17, as it adopts a comprehensive and integrated approach based on institutional partnership, policy-oriented scientific research, and broad community education.

The following is a detailed analysis of the university's contributions to each indicator of SDG 17:

17-02 Relationships to Support the Goals

17-02-03: Does your university as an entity participate in international cooperation regarding the collection or measurement of data related to sustainable development goals?

Yes, the university actively contributes to international cooperation in data collection and measurement:

- **Participation in International Research Programs:** The university participates in major research programs with international partnerships, such as the "Assessment of Water Resources under Climate Change" project in cooperation with the University of Montpellier (France), University of Tunis El Manar (Tunisia), and the International Water Management Institute (IWMI).
- **Unified Methodologies:** The university is committed to using unified methodologies and agreed-upon international standards, using certified measuring devices and unified research protocols, ensuring comparability and integration between locally and globally collected data.
- **Contributing to Global Databases:** The university contributes by uploading collected and processed local data (climate, biodiversity, water quality, social and economic indicators) to specialized international platforms to support comprehensive global analyses and formulation of international policies.
