SDG 17: Partnerships for the Goals

Abbas Laghrou University of Khenchela, based on the detailed report, is a pioneering model in achieving SDG 17, as it adopts a comprehensive and integrated approach based on institutional partnership, policy-oriented scientific research, and broad community education.

The following is a detailed analysis of the university's contributions to each indicator of SDG 17:

17-02 Relationships to Support the Goals

17-02-04: Does your university as an entity, through international cooperation and research, review comparative approaches and develop international best practices in dealing with sustainable development goals?

Yes, the university exchanges expertise and develops practices through research and international partnerships:

- **Research and Consultancy Partnerships:** The university has developed strategic research partnerships with global universities (such as Southwest State University of Russia, and institutions in France, Tunisia, Morocco, and Spain) to implement joint projects in renewable energy, water management, and green economy.
- **Reviewing International Experiences:** The university's major events included presentations of "pioneering international experiences in the field of green transition," indicating a review of comparative approaches. International virtual meetings also included exchange of experiences in achieving sustainable development goals.
- **Training and Capacity Building:** The university organizes specialized training courses in cooperation with international partners on modern data collection techniques, advanced statistical analysis, and modeling software, transferring best methodological practices to its cadres.
- **Knowledge Dissemination:** The university publishes its research results in peer-reviewed international scientific journals with high impact factors, contributing to enriching global knowledge about sustainable development in arid and semi-arid regions.
