Abbas Laghrour Khenchela University

16-03 Working with the government

16-03-01

Keen to leverage its academic expertise and contribute to the public good, the University of Khenchela has established a framework for providing specialised advice to government bodies at the local, regional and national levels. This policy outlines how the university can support government decision-making through knowledge sharing, research and advisory roles.

The university seeks to strengthen its interaction with various bodies at both the local and national levels through ongoing coordination and participation in specialised committees. This is achieved by:

- Submitting proposals aimed at developing educational policies.
- Providing its expertise in the field of sustainable development.
- Submitting reports and providing administrative and technical advice.

16-03-02

Yes: In order to promote informed policymaking and support the continuous development of legislators, the University of Khenchela has developed a communication and education policy aimed at improving the skills and building the capacities of policymakers and legislators. This initiative focuses on providing important knowledge and insights on

pressing issues such as economics, law, technology, migration, displacement and climate change.

The university also provides various services, particularly in the field of training and skills development for local decision-makers and policymakers in economics and law.

16-03-03

Yes: To enhance its contribution to policy-making and consolidate strong relationships with government bodies, the University of Khenchela has developed a policy for participation in government research. This has involved conducting policy-focused research in collaboration with various government departments, with the aim of providing evidence-based solutions to pressing societal challenges.

Through this framework, the University of Khenchela can actively participate in government research, provide valuable expertise, and contribute to the development of informed and effective public policies that benefit society as a whole.

*Collaborate with research centres and government departments to address local challenges in a scientific and effective manner.

-16-03-04

Yes

The university seeks to provide open scientific platforms and spaces for frank discussion of challenges through meetings, consultations and exchanges of views with the aim of promoting community dialogue.
